AREA OF EXPERTISE

Project management Site coordination SEVESO site and ATEX standard, Management

QUALIFICATIONS

CESI General Engineer

KEY SKILLS:

Global management of TCE projects: Structural work, finishing work, roads and utilities, clean rooms

Multi-domain technical knowledge: HVAC, electricity, piping, steel frame, automation

Management & Leadership: Organization, division of responsibilities, conflict resolution

Contractual & financial management: Budget monitoring, KPIs, reporting to top management

Standards & Safety: SEVESO, ATEX, QHSE, ISO

Tools: MS Project, SAP, AutoCAD, SolidWorks, REVIT

Programming :
SQL, office VBA, VB.net

FORMATIONS

General Engineer (2021):
Project management, QHSE, LEAN and LEAN Management,

Certification PMP -PMI (2023)not renewed
Preparation for the international PMP certification

BTS industrial product design (1998)
Mechanical, strength of material, Piping, Compressed Air, Automation

Baccalaureate in Electrical Engineering (1995)
Electricity and Power Electronics

LANGUES

English fluent (TOEIC 680)

LOISIRS

Passionate about computers; Reading

Project Director / PMO / Construction Manager

Industrial / pharmaceutical / cosmetic projects

Engineer with more than 15 years of experience in the management and management of complex industrial projects, I am specialized in multi-lot coordination (TCE + process/utilities) and the alignment of stakeholders on projects with high technical, regulatory and financial stakes.
I work on major programs (up to 900M€ – gigafactory, pharma, heavy infrastructure) with a strong expertise in project governance, risk management, time/cost control, and resolution of critical situations in a constrained environment (SEVESO, ATEX).
Recognized for my ability to secure projects and streamline interactions between project owners, project managers and companies.

Available quickly – mobile France / Belgium.

PROFESSIONAL BACKGROUND:

MC CAIN-Project Director/PMO Lead | Harnes
07/2026 – 11/2026
As Project Director of the Zenith Phase 1 program for McCain in Harnes, I was responsible for the overall governance of the project, taking over from the resigning predecessor from the execution phase to industrial commissioning. My role is to ensure that safety, quality, cost, time and performance objectives are met, while coordinating all stakeholders. Global coordination of building and process works, with definition of priorities according to operating constraints

- Overall management of the Zenith Phase 1 program and its strategic objectives.
- Management of the budget, schedule and risks of the project.
- Coordination of engineering, construction, commissioning and operations teams.
- Privileged interface with McCain and key project partners.
- Guarantee of compliance with HSE (Health, Safety, Environment) requirements through the PSMS MC CAIN and quality.
- Monitoring of the performance of contractors and suppliers.
- Animation of governance bodies and reporting to management.
- Management of technical, financial and organizational trade-offs.
- Preparation and securing of the start-up and transfer to operation stages.

CHANEL-AMOA process /OPC | Venette
04/2025 – 03/2026
Coordination of process and building works for the CHANEL Venettes site: management of the MOA/MOE interfaces, management of operating priorities, schedule monitoring, management of additional work and resolution of project conflicts

- Overall coordination of building and process work, with definition of priorities according to operating constraints
- Management and resolution of conflict situations between project managers, project managers and companies, promoting collaboration and continuity of work

VERKOR-PMO/PDO (gigafactory) | Bourbourg
06/2024 – 03/2025
Assistance to the Senior Project Director for the construction of a Gigafactory (budget 900 M€)

- Structuring of teams (planning, risk management, change management, doc control)
- Detection and management of perimeter deviations, resolution of MOA/MOE conflicts
- KPI development and strategic reporting

NOVONORDISK – Construction Manager | Chartres
07-2023 – 05-2024
TCE management of a pharmaceutical building (€70 million)

- Coordination of project management, quality monitoring, safety and progress
- Acceptance of clean rooms and utilities, commissioning of ISO 5 production hall

BENEO ORAFTI – PMO | Oreye (Belgique)
02/2022 – 05/2023
Planning and financial monitoring (€260 million)

- Consolidation of budgets, KPI reporting to top management

CATALENT Masthercells – Construction manager | Gosselie (Belgique)
11/2021 – 01/2022
TCE management of a pharmaceutical building (€53 million)

- Company management, validation of test protocols and commissioning
  Control of A- and B-rated areas (ISO 5) and associated utilities

UNIVERCELLS – Construction manager| Jumet (Belgique)
05/2021 – 10/2021
general construction work management of two pharmaceutical buildings (€80 million)

- Coordination of work,
- Validation of protocols commissioning Utility,
- Validation of equipment commissioning protocols

Other experiences:

- **Indachlor,**
- **Eurotunnel,**
- **wind projects,**
- **architecture and complex buildings**
